

OERTLI

Excellence in solid wood

**Professional partner
for professional
woodworkers**
Our company

OERTLI Werkzeuge AG «Excellence in Solid Wood»

**You can't buy „excellence“
... but you can earn it.**

One hundred years of experience, experts with application know-how in the development of high-performance tools as well as in wood processing with the motivation to seek and implement new solutions. This has made us one of the technology leaders in professional wood processing worldwide.

High-tech with tradition

We are a traditional family business with headquarters in Switzerland. With highly trained employees, modern, partially automated CIM production facilities and solution-oriented processes, the innovations for new tool solutions take place here.

More than tools ... a comprehensive partner

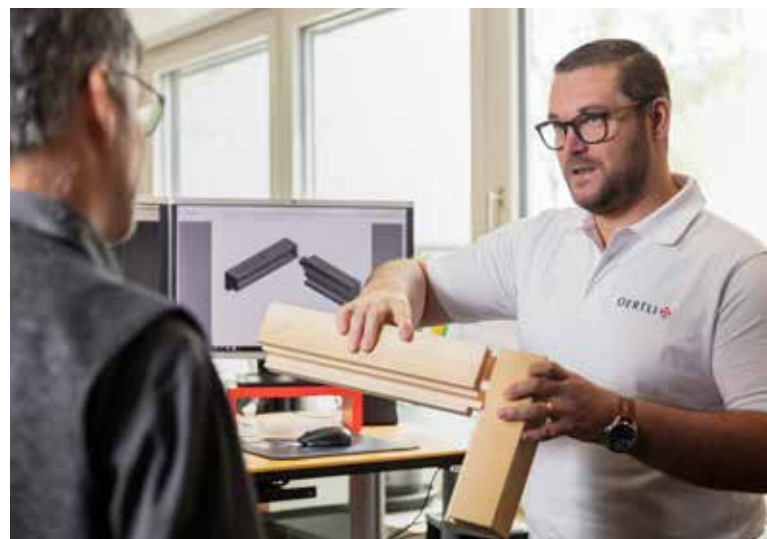

We see ourselves as a comprehensive partner for professional woodworking. Individual tool solutions for our customers' production environments are our strength. In addition, we also offer a proven standard range of tools for a wide variety of woodworking applications. On request, we accompany with services such as engineering, application consulting, documentation, training as well as complete project support.

State-of-the-art production facilities and trained experts guarantee the high precision and quality of the tools.
